Fastest PeopleSoft Test Automation Tools

ASTUTE
BUSINESS SOLUTIONS

PeopleSoft Test Automation &
Test Cost Reduction
using PeopleSoft Test Framework

FASTEST

VALUE PROPOSITION

001 *Automate Regression Testing*

Drastically reduce reliance on business and IT testers for quality certification of V9.2 Upgrades, PUM, Tax Updates, Enhancements and New Module Implementations

002 *Accelerate Deployments*

Automate tests to speed up project deployments while increasing quality assurance

003 *Increase Test Coverage*

Extensively cover features and usage scenarios to reduce bugs and de-risk projects

004 **Reduce Costs**

Automate tests to speed up project deployments, reduce dependence and spend on manual testers all the while increasing coverage & over testing quality

FASTEST

OVERVIEW

VANILLA

Pre-built tests available for all V9.1 and V9.2 features – Load and Use

CUSTOM

Modify pre-built tests to include custom features.
Create new tests as needed.

PROCESS

Process Sequencer automates end-to-end process tests. Alleviating the resource utilization of system and user acceptance testing resources.

INTEGRATION

All PeopleTools based integration tests can be automated with FasTest; including staged data from interfacing applications and the generation of downstream data via test scripts out of PeopleSoft.

COMPLIANCE

Pre-built SOX SOD compliance library can be scheduled to run automatically

FASTEST

1

Accelerate

TIME TO DEPLOY

Deploy 1000's of pre-built tests across all applications and modules in one week or less

2

Reuse

REPORT AND TRACK

Use pre-built Dashboards with Test KPI's to track test progress in real time

3

Scale

HIGH REUSABILITY

Reuse tests for PUM, Tax Updates, Bundles, Upgrades and new Implementations.

4

Save

COMPLIANCE

Automate execution and tracking of compliance tests
- SOX SOD, HIPAA, EEO etc.

SCALABILITY

Scale from a few to many tests to handle large volumes FasTest TestPlosion data mining tools.

FASTEST

TEST AUTOMATION TOOLS

TEST CASE GENERATOR

Instantly create multiple test cases or test data sets to improve test coverage, increase assurance and de-risk your project outcomes

DASHBOARDS

Visualization and instant reporting & feedback for management and stakeholders.

TEST MANAGER

Manage, copy, move, assign and perform other maintenance tasks in bulk instead of one at a time. Use the latest Fluid interface to use it on mobile devices.

PROCESS SEQUENCER

Sequence or group anything from end-to-end process tests to module tests and configuration and integration tests

TESTPLOSION

Automate test data mining and testdata creation by leveraging your own transaction history

DEFECT MANAGER

Create defects, assign it to other PS users, use workflow to route, add attachments and report/export defect data

OUR APPROACH

PROVEN EXPERTISE

Specialized in PeopleSoft, Test Automation, Business Consulting and Oracle Cloud

DOMAIN EXPERTISE

Industry expertise in Public Sector, Domain Expertise in Finance, Procurement, Project and Planning

AGILE METHODS

Utilizing proprietary and Oracle rapid implementation tools and accelerators

BUSINESS TRANSFORMATION

Combining Business Consulting, Change Management, Technology Integration to deliver true business value via the Oracle Cloud
