

# Move and Modernize VMware Estates to Oracle Cloud VMware Solution

Modernizing VMware workloads can be challenging due to the required changes in systems and application architecture, often increasing risk and cost. Oracle Cloud VMware Solution (OCVS) allows you to move your VMware workloads to Oracle Cloud with minimal changes to application architecture. It lets you fully manage your VMware environments while benefiting from modern cloud functionality and the advantages of public cloud services.

## Key Benefits of OCVS

- ✓ Get better scalability, agility, and flexibility
- ✓ Enables migration of VMWare estates as-is & as-a-whole
- ✓ Access to OCI Cloud Native Services
- ✓ Provide full administrative control to customers
- ✓ 1440x Faster provisioning for environments
- ✓ Offers core-to-edge protection with built-in security

## Use Cases

### Data Center Migration

Move workloads from on-premises to Oracle Cloud VMware Solution to consolidate or decommission data center operations.

### Disaster Recovery

Enhance business continuity and disaster recovery by connecting your existing infrastructure to an alternate site on Oracle Cloud using vSphere.

## Hybrid Cloud with Native VMware tools

Optimize your hybrid cloud setup with VMware tools like vCenter, ESXi, vSAN, and vMotion for seamless management and migration.

## Virtual Desktop Infrastructure

Simplify managing virtual desktop environments and applications using VMware Horizon on Oracle Cloud VMware Solution.

## How Does OCVS Differentiate From Others?

**Customer Control:** OCVS offers complete control to users, allowing them to manage their cloud infrastructure.

**Updates, Patches, and Upgrades:** Customers can decide when to apply updates, patches, or upgrades, giving them the flexibility to manage changes on their schedule.

**Availability:** OCI is globally available in more than 40 regions, ensures broad geographic coverage, and enhances global scalability.

**Security:** Customer owns root credentials that ensure sensitive data and systems are entirely under the user's control.

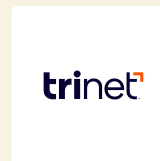

**Deployment:** OCVS is deployed in the customer's Virtual Cloud Network (VCN), which means the customer defines the networking environment.

## Customer Success Stories

### Maxim's Group

Maxim's Group saves **114%** with Oracle Cloud VMware Solution.

### TriNet

TriNet successfully migrated on-premise VMware to OCVS in **9 months**.

### Rumo

Rumo runs Brazilian **railroad operations** on Oracle Cloud.

### Entel

Entel expands with **VMware apps** on Oracle Cloud, cutting costs **by 50%**.
